
Input
Global Teaching Goal
Algebra Goal: linear equations with one variable.
Student Profile (Tree + Scores)
Numerical Calculation 2 / 5
Abstract Thinking 2 / 5
Logical Reasoning 3 / 5
Analogy Association 3 / 5
Spatial Imagination 3 / 5
Dataset
Algebra Dataset: Pen costs $3.Total $5 for 1 pen and 2 erasers. Cost of 1 eraser?
2x + 3 = 5
Tree-Based Local Search Stage
Structure {i}
Tutor
Example
Knowledge
Lesson Plan
Knowledge: linear equation
Example: 4x+2=10
Performance
Error Analysis
The steps are not specific enough
Proposal: Create a new agent for details.
Structure {i+1}
Detail
Lesson Plan
Knowledge: linear equation
Example: 4x+2=10
Detail: Explain step by step

Output layer
Optimized structure
Final Lesson Plan
Knowledge: linear equations basics
Concept: ax + b = c form
Example: 3x + 5 = 20
Detail: isolate variable steps
Guide: practice and extension problems
New Student Profile
